

Waterlilies

Floating on water

Jump from one floating block to the next. Like this, everyone can walk on water! These inflatable water lilies can be linked up to create a track on water, but can also be used as separate parts. Who has what it takes to make it across the pool - one lily at a time - without falling in the water?

Safe and complete

JB develops and manufactures attractions that can safely be used by all players. All water games we offer are certified in accordance with the NEN-EN 15649:2009 safety and quality standards. That is why we provide an approved inspection certificate, a log book and a clear manual for every water attraction. In addition, all products come with a Bravo air pressure gauge to ensure the right air pressure is entered. The anchor points have to be fastened with appropriate anchoring materials to keep the product in place and prevent it from floating off or getting too close to other objects. Because the item is airtight, no constant air supply is needed. In short, the attraction only has to be inflated once for the fun to start! We have thought of everything. Just leave it to us!

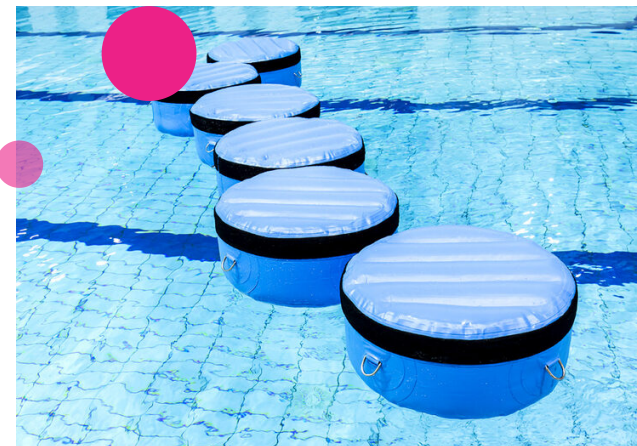

Durable quality

We set extremely high demands on all our products. In order to guarantee their quality, we use high frequency welded PVC material of 900 gr/m². The material is strong and colourfast to make the lilies durable and they are easy to keep clean to boot. The airtight water lilies come with a 1-year warranty.

Purchase these fun inflatable water lilies for use in the pool and deliver the experience your customers will remember as a fantastic day!

More than 15,000 customers have already been jumping for joy

We have been in business for well over 15 year now, and have provided services for more than 15,000 customers around the world. Our team of designers, developers and logistic staff supply unique inflatable attractions in a grand way! All JB customers can count on professional service and delivery. That is exactly why they tend to call us 'creators of greatness'.
